## 3. Freighters

A total of 10 freighters have been ordered from the Neptun-Werft, and this yard has subcontracted the Warnow-Werft, Warnemuende, to build two of that number. Personnel from the Warnow-Werft are at present at Rostock inspecting building techniques. The Neptun-Werft will supply the Warnow-Werft with all the necessary material for the construction of the two vessels. The Warnow-Werft has accepted this commitment in place of the two standard freighters which were to have been built there.

- 4. The two freighters already completed at the Neptun-Werft have now been named KALUGA and KOLOMNA. Work on a third ship of the series has been started.

  All of the ships conform to the following specifications:
  - b. Beam 14 m
  - c. Single screw
  - d. Two boilers, automatically coal-fed via a conveyor belt which runs from the coal bunkers to the boiler.
  - e. One main propulsion steam engine developing 1800 HP and a maximum of 85 shaft revolutions, giving a speed of 14 to 16 knots.
